

from innovation, hope

Exsurco® Medical, Inc. is a leading-edge device manufacturer for burn and trauma patients in the surgical markets and tissue banks. Committed to improving excision science, Exsurco Medical continuously works with customers to provide innovation that ultimately allows them to deliver the healing power of skin to patients in need. Conveniently located west of Cleveland in Wakeman, Ohio.

our people

Our mission at Exsurco Medical is to redefine excision science across the continuum of care through delivery and advancements in clinical solutions, strategic healthcare partnerships, and strong customer knowledge. We are committed to improving patient lives and outcomes by advancing innovation, product development, and the marketing of medical devices for healthcare professionals in the surgical and tissue bank markets.

Exsurco Medical's highly skilled and dedicated team works diligently to provide our customers with exceptional products and service. From our vertically integrated production facility with a dedicated Class 7 cleanroom to our highly-trained sales professionals — **our focus is on serving the tissue bank, tissue processing, and surgical communities.**

our history

Exsurco Medical, Inc. was established in 2011 in Wakeman, Ohio. The company was founded on a commitment to healing through the improvement of excision science. As a manufacturer of devices for tissue processing and recovery of allograft skin for cadaveric use, surgical products for wound debridement, and skin grafting, Exsurco Medical, Inc. provides the innovation needed to help improve and simplify procedures.

The first devices Exsurco Medical, Inc. developed focused on breakthrough allograft donor tissue recovery. The company works with the tissue bank community in ways that increase technician safety and comfort and minimize fatigue, while providing higher yields of skin used for life-saving allografts. The **Amalgatome® MD** and the **Amalgatome® SK** are backed by inventive expertise and compassionate commitment. Exsurco Medical, Inc.'s excision and grafting innovations help restore dignity, confidence, and optimism to the lives of both tissue bank personnel and to the patients that ultimately benefit from donor allograft tissue.

In April 2017, Exsurco Medical, Inc. launched a new skin grafting and wound debridement device approved for surgical applications. The **Amalgatome® SD** is an innovative breakthrough in skin grafting and wound debridement, and features a unique sterile and disposable cutting ring design that is integrated with gear teeth to allow the device to cut in a rotational pathway. Rather than using a back-and-forth cutting motion or pushing forcefully against the skin, it glides smoothly over the patient's skin or debridement area. The pneumatically powered and reusable Amalgatome SD provides effective wound debridement, including removal of necrotic tissue and eschar. Plus, it is capable of producing uniform, consistent skin grafts in thicknesses ranging from 0.005" to 0.045" in increments of 0.001 inches.

Exsurco Medical, Inc. is a wholly owned subsidiary of Bettcher Industries, Inc. Bettcher is an ISO 9001-certified, vertically integrated manufacturing company operating in more than 60 countries throughout the world. The company is a leading developer and manufacturer of innovative equipment for food processing, food service, industrial, and other operations. Exsurco leveraged Bettcher's proven technology to develop innovative technologies and devices for tissue recovery and processing. Established in 1944, Bettcher brings more than seven decades of successful innovation to the market, including holding nearly 100 active patents. **The company is 100% employee-owned.**

Exsurco Medical, Inc. is an ISO-certified and FDA-registered medical device company.

our commitment to caring

Exsurco® Medical, Inc. is a proud corporate sponsor of **Donate Life America**, a non-profit organization committed to saving and healing lives through increased organ, eye, and tissue donation. Exsurco Medical supports efforts to spread the word about the importance of tissue, organ, and eye donation, and joins with other companies and volunteers across the country to emphasize the importance of tissue and organ donation.
